

treesSC

connecting people and trees

Trees SC is a state-wide, non-profit 501(c)(3) organization founded in 1991. Our mission is to provide a forum for the stewardship of South Carolina's urban and community forests.

Our **goals** are:

- To extend the collective knowledge and awareness of the value, management and wise use of trees
- To facilitate information exchange concerning the management of urban and community forests
- To encourage citizens to take an active interest in the care and management of urban and community forests

We **achieve** our goals through the following programs:

Educational Programs: Annual Conference, South Carolina Arborist Workshops (SCAW), and Canopy Sessions

Annual Awards Program: We recognize individuals and organizations that make outstanding contributions to urban forestry in our state through the Golden Acorn Awards, and our Heritage Tree Award recognizes a special community tree or group of trees that have historical and/or cultural significance.

Awareness: *The Acorn*, Trees SC's e-newsletter, is the source of information for the industry in the state.
